

## **Front End Web Developer**

Join a Toronto-based, Internationally successful hospitality technology leader. ResortSuite is an innovative and rapidly growing company that has managed guest information and streamlined operations for some of the most prestigious hotels, resorts, spas and clubs in the world.

As a member of the development team, you will be a part of developing the next generation of user interfaces for the company's web and mobile based software systems.

Your combination of professional backend and frontend development experience along with a good sense for UX will be put to good use on projects requiring novel approaches to familiar problems. You'll even have occasion to do some devops work to help coordinate large software rollouts and sit in on client calls. If you are interested in stimulating and challenging software development work, are energetic and have a curious mind then you will be a good fit for this position.

This is a full-time on-site employment position.

### **Technical Expertise:**

General Qualities:

- Familiar and experienced with current best practices for mobile and desktop UX
- Conversant in contemporary software design patterns, common devops tools (like npm modules, webpack, etc.)

Essential Skills:

- Very high level of proficiency employing HTML and CSS for layout
- Ability to conceptualize and mock up UX flows
- Strong familiarity and comfort implementing component interactivity using frameworks like Angular and React, or vanilla Javascript and jQuery
- Ability to wire up data to UI elements from models/stores
- Ability to use git version control

Preferred Additional Expertise:

- Unit and end-to-end testing
- Node.js + express, or equivalents from PHP, ruby, python, etc
- Mongodb (or similar, including storage patterns) or mySql/Oracle/etc. (including complex queries, optimization)
- Defensive programming, XSS and injection attack prevention
- Build systems such as grunt, gulp, browserify, etc.
- Cordova (PhoneGap)
- Sysadmin: apache or nginx, /etc/\*, rsync, cron jobs, creating Windows services

**Education and/or Experience:**

Computer science, software engineering or similar university degree, or equivalent professional experience. This is not an entry level position. Exposure to the hospitality industry is a definite asset.

**Work Environment:**

Based in Liberty Village in Toronto, the company vibe is professional, high energy, team oriented and collaborative. Our work environment is bright and open. We believe good gear and comfortable surroundings help us be most productive. We like to celebrate our successes and enjoy the camaraderie that brings.

Reasonable accommodations may be made to enable individuals with disabilities to perform the job functions.

**To Apply:**

Forward your résumé and cover letter to: [careers@resortsuite.com](mailto:careers@resortsuite.com). In your cover letter, please include links to your StackOverflow, github or other relevant profiles and/or to other samples of your work. If you have any pressing thoughts on software design please share them.

No agencies. Interviews will be conducted on-site in Toronto, Ontario, Canada. This is a full-time in-office position; offers for remote work or outsourcing will not be considered.
