

# TOP 10 REASONS

to Implement an Integrated Multi-Vendor Solution

## 1 ResortSuite GuestEX: WEB, MOBILE, CONNECT

Increase your direct booking revenue while delivering the most convenient booking experience for your valued guests. GuestEX provides a combination of targeted email marketing, a customizable mobile app and an online booking engine for rooms, spa treatments, activities, golf tee times, ski lift tickets, dining reservations and more.

## 2 ResortSuite OPS: Streamlined Operations

ResortSuite OPS is your full suite of applications designed to streamline and improve your guest service operations with tablet-based applications for PMS, SPA, F&B and GOLF. ResortSuite OPS also includes a DASHBOARD that gives you web-based access to monitor your KPIs in real-time.

# 3

## Single Guest Profile: HTNG Two-Way Integration

One-stop access to the information your staff needs to deliver a five-star, personalized guest experience everytime. With the HTNG Single Guest Itinerary interface, ResortSuite modules can integrate seamlessly with other PMS and POS systems. ResortSuite can also synchronize guest profiles across all modules and produce a detailed single guest itinerary.

# 4

## Financial Reporting

Easily post charges from spa, golf, ski, and retail to a guest's room. More than just posting, ResortSuite's two-way integration with other best in class PMS & POS systems offers a more granular approach. Get detailed information for every cross-property transaction for accurate revenue reporting.

# 5

## Hosting Flexibility: On-Premise or In the Cloud

With fully integrated solutions designed to streamline horizontally complex and multi-property operations, ResortSuite offers a seamless operation for your property, whether hosted on an on-premise or private cloud implementation.

# 6

## The Most Secure Full-Service Hospitality Solution

Yield rates across rooms, spa treatments, activities, golf tee times and dining through ResortSuite's advanced revenue management capabilities and built-in inventory system that allows you to create POs and track all inventory for your property.

# 7

## Synchronized Club Posting to Membership Accounts

ResortSuite's CLUB module allows your members to post charges from all areas of your operation to their account. Funneling information from your PMS and POS systems along with information from other ResortSuite modules, provide your guests and staff itemized statements of all charges across the property.

# 8

## Built-in Inventory & Revenue Management Functionality

Yield rates across rooms, spa treatments, activities, golf tee times and dining through ResortSuite's advanced revenue management capabilities and built-in inventory system that allows you to create POs and track all inventory for your property.

# 9

## Open Platform, Adaptable Functionality

Built on an industry-leading Oracle platform with proven business rules exposed via open XML standards, your enterprise hospitality software is future-proofed. Take full advantage of cloud computing, virtualization, mobile, tablets and the latest in technology hardware and software services.
