

TOP 10 REASONS

to Implement a Fully Integrated Solution

1 Single Online Booking for All Amenities

ResortSuite Web offers guests a complete, self-service online booking engine for rooms, spa treatments, activities, lessons, golf tee times, ski tickets and dining reservations – all in a single online transaction. Everything is updated in real-time, allowing guests to explore all amenities and book their entire experience.

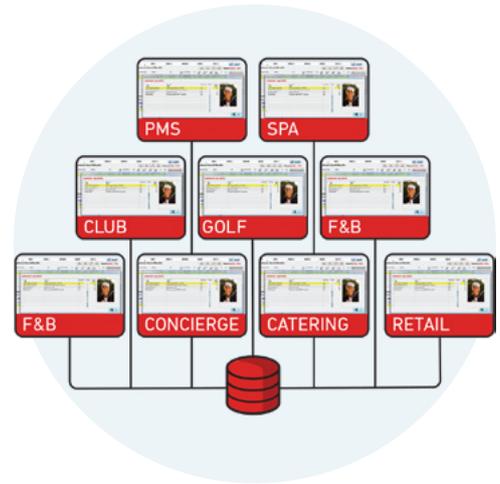

2 The Convenience of a Mobile Concierge

Allow your guests to conveniently select activities in real-time and self-book reservations while on-the-go. ResortSuite Mobile provides full access to itineraries, member profiles, statements and rich branded content, enabling guests to immerse themselves in all your property has to offer.

3

Single Guest Profile

Hosted on a guest-centric CRM platform, ResortSuite provides a one-stop access to guest profiles that can be shared across all operations. It removes duplication of guest data, helps streamline operations and personalizes the guest experience.

4

Reduce IT Costs with True Integration

ResortSuite's truly integrated and module-based technology improves management efficiencies by removing fragmented or disjointed systems; thus, eliminating the costs of unnecessary interfaces by third party providers.

5

Hosting Flexibility: On-Premise or In the Cloud

With fully integrated solutions designed to streamline horizontally complex and multi-property operations, ResortSuite offers a seamless operation for your property, whether hosted on an on-premise or private cloud implementation.

6

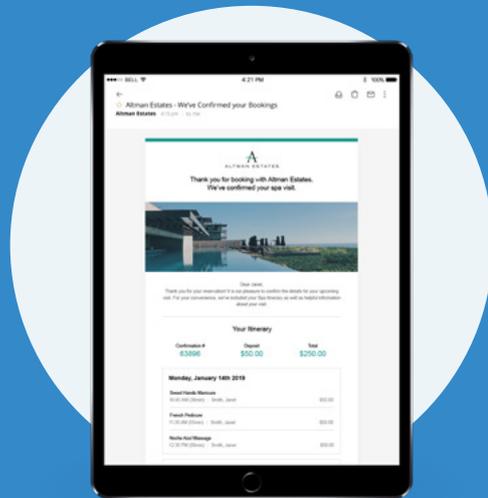

Built-in Inventory & Revenue Management

Yield rates across rooms, spa treatments, activities, golf tee times and dining through ResortSuite's advanced revenue management capabilities and built-in inventory system that allows you to create POs and track all inventory for your property.

7

Targeted Marketing Automation

ResortSuite Connect allows for pre-arrival and on-property confirmations, cancellation notices and post-stay messaging. Yield higher revenue per guest through promotional email campaigns based on guest patterns across all operations.

8

Streamlined Operations, Unparalleled Guest Service

Streamline and improve your guest service operations with tablet-based applications for PMS, SPA, F&B and GOLF. ResortSuite OPS also includes a dashboard that gives you web-based access to your entire operation, enabling you to monitor your KPIs in real-time.

9

The Most Secure Full-Service Hospitality Solution

The integration of Resortsuite and Shift4 allows for a highly secure and integrated platform for your property. Security of guest information is maintained through Point to Point Encryption (P2PE), in which credit card data is encrypted in the credit card device.

10

Open Platform, Adaptable Functionality

Built on an industry-leading Oracle platform with proven business rules exposed via open XML standards, your enterprise hospitality software is future-proofed. Take full advantage of cloud computing, virtualization, mobile, tablets and the latest in technology hardware and software services.
